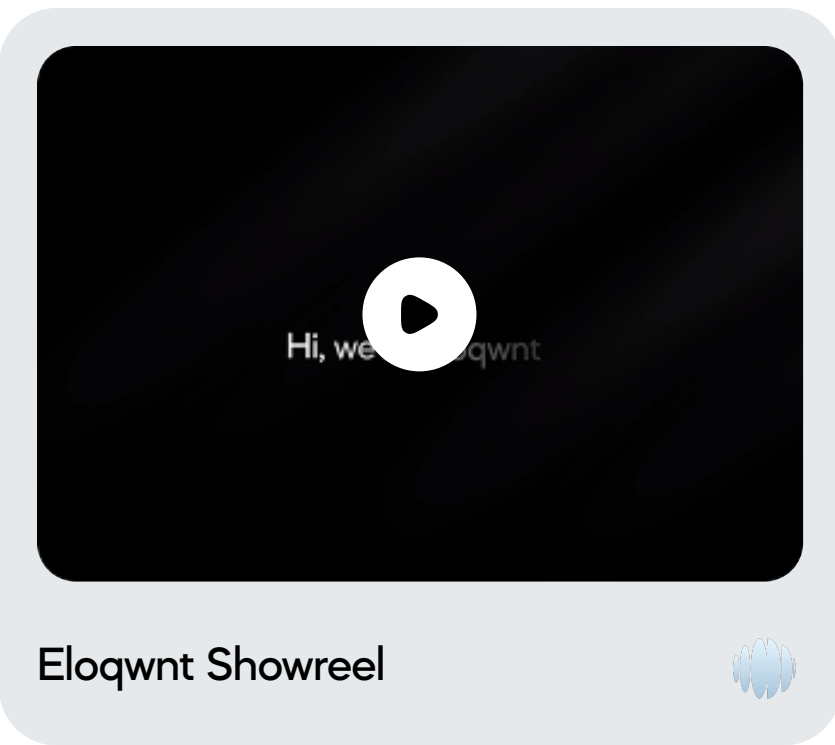
- Who we are



Eloqwnt Showreel

Most of our clients experience the same gap - between what they are and how they're perceived.

Eloqwnt is a design agency for tech and corporate leaders at turning points — pre-raise, post-acquisition, market expansion, or a full repositioning. We've seen what happens when a company's brand lags behind its ambition. Investors notice. Deals stall. Talent looks elsewhere.

We close that gap by turning internal truth into external perception — through clarity, position, signal, proof, and memory.

About us

- Selected Work

Companies that closed the perception gap and what changed.

- AI, UK

Vertus AI

Vertus AI is tech company building cognitive systems that operate at institutional scale - deploying intelligence across capital markets, scientific research, and financial infrastructures.

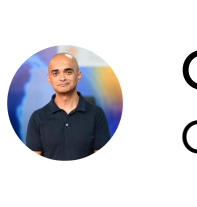
- Testimonials

Eloqwnt rebuilt The Virtual Slimming Clinic into a brand that finally matches the clinical operation behind it. They didn't give us a louder weight-loss brand, they gave us a system, with four strategic pillars and a defined voice that the whole team now uses.



Qadir Hussain
CEO

Our previous website failed to reflect our standard of high-end storytelling and technology, limiting our ability to attract the right tier of work. After Eloqwnt redesigned the site, it feels like we're presenting ourselves at the level we operate and it has shifted the caliber of partners reaching out.

Halie Graham
Executive Producer

What I can say though is that the new website get lots of trust, and influencers and brand clients get convinced for working with Metapic only by looking at the website :))

Jonathan
Associate Founder
